

ANALOGUE INPUT MODULE TYPE I7110-8A

The I7110-8A eight-channel analog input module measures and converts analog signals from 4-20 mA transmitters to digital data:

- 8 universal analogue input channels
- Standard input signals 0-1 V, 0/4-20 mA
- Universal 230 VAC / 24 VDC power supply
- RS485 Modbus RTU-Interface
- DIN-rail or wall mount

ANALOGUE INPUT MODULE (SPECIFICATIONS)

SUPPLY VOLTAGE: 90...264 VAC/ 20...375 VDC

POWER CONSUMPTION : <6 VA

WIRING: 2x2x0,75 mm², shielded

NUMBER OF INPUTS: 8

PROTECTION CLASS: IP 20

OPERATING CONDITIONS: -10...+55 °C, < 80 % RH

WEIGHT: 400 gr

CERTIFICATIONS: CE

DIMENSIONS AND CONNECTIONS
